1) What is an arthropod?

__________________________________________________________

2) Have you ever seen a mollusk or crustacean? Describe the animal and where you saw it.

__________________________________________________________

__________________________________________________________

3) Why has the blue crab population decreased? What do you think can be done to help blue crabs?

__________________________________________________________

__________________________________________________________

__________________________________________________________

4) If you could be any crustacean, what would you be? Why? Hint: follow the links to do some research about crustaceans.
